

List of RM Roadmap (National) Ambassadors and Associate Ambassadors

RM Roadmap Ambassadors inform their national/local communities about the RM Roadmap project based on information given by the RM Roadmap consortium partners.

The ambassador/associate is not officially representing the RM Roadmap project or consortium and cannot make any commitments of any kind on behalf of the consortium. Please note that country groupings are based upon a match between contact partners and the relevant research management skillsets and are not geographically or politically selected. All ambassadors and their countries were selected in accordance with experience and connectivity to existing research management networks.

Acknowledgements:

We would like to thank all ambassadors, associate ambassadors and their employers/institutions/national networks for the support in such a collective endeavor.

The overarching objective of RM ROADMAP is to identify and adapt the research management capital base of the EU, including the widening countries, and emerging needs of its current and future research management workforce to improve EU's competitiveness and sustain its economic performance.

The project will connect existing European networks on a smart community platform which will enable an unprecedented co-creation process in research management in the world.

This co-creation process will gather the existing communities and expand upon them to reach two main objectives: To create and inform a bottom-up consensus on the future of research management in a roadmap (RM ROADMAP), and to inform about existing training, networking, funding, and mobility opportunities.
