Acknowledgements:

We would like to thank all ambassadors, associate ambassadors and their employers/institutions/national networks for the support in such a collective endeavor.

The overarching objective of RM ROADMAP is to identify and adapt the research management capital base of the EU, including the widening countries, and emerging needs of its current and future research management workforce to improve EU's competitiveness and sustain its economic performance.

The project will connect existing European networks on a smart community platform which will enable an unprecedented co-creation process in research management in the world.

This co-creation process will gather the existing communities and expand upon them to reach two main objectives: To create and inform a bottom-up consensus on the future of research management in a roadmap (RM ROADMAP), and to inform about existing training, networking, funding, and mobility opportunities.
